

FIRST Robotics

For the Inspiration and Recognition of Science and Technology
 FIRST is a non-profit organization aimed at inspiring the youth of today by pairing them with current professional mentors in the fields of engineering, business, manufacturing and computer science. The efforts of FIRST engage students and excite them to join the fields of science, technology, engineering and mathematics (STEM). Our students in FIRST robotics are part of the future in manufacturing and engineering.

2023/24 Team Agenda

- ★ Host K-12 Robotics Events
- ★ Expand program to reach more students
- ★ Qualify for the World Championship

A New Workforce

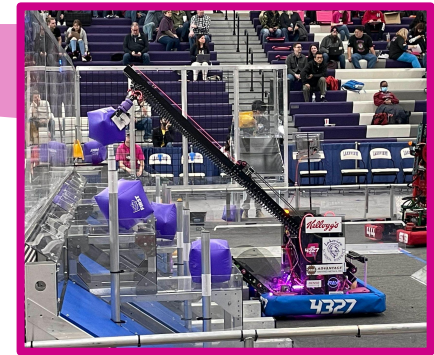

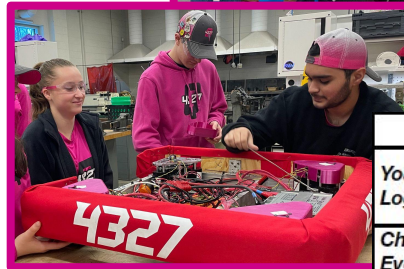

FRC Competition

Over 3600 teams around the world and more than 500 in Michigan receive a new challenge every January. Teams of students and mentors then have six weeks to design and construct a robot to compete at two district events. Each event consists of 40 teams with advancement opportunities to the State and World Championship levels. Funding obtained through sponsorship supports the team by paying for registration fees, travel expenses and the various parts used to develop the competition robots.

Funds provided by sponsors are an investment in a well prepared and excited workforce. The students involved in today's team become tomorrow's top engineers, machinists and inspirational leaders. Our alumni go on to work for manufacturers in and around Battle Creek as well as move on to universities such as UM, MSU, MTU, and MIT.

Sponsor Benefits

To show appreciation for your generous support, sponsor logos and information about your business are shared through our various media outlets. Premier level sponsors will be featured on shirts, banners, websites, and newsletters for all 12 robotics teams through the Lakeview School District. Championship level sponsors get special recognition at the State or World Championship events pending team qualification.
